BUSYBROOK HOLSTEINS

FOREWARD

Busybrook Holsteins are extremely excited to present to you the catalogue for our upcoming Platinum Edition Sale.
We have put together a selection of some of the best animals in our herd, made up of both North American genetics and high indexing NZ bred animals. We hope that in this diverse offering you will find something that would be an asset to your herd.

At Busybrook we are passionate about Holstein genetics be it NZ index or North American type and production animals. We strive to breed the best cow possible no matter which side you might prefer!

We aim to breed our NZ index cattle for extreme BW, functional type, high components and fertility and of medium body weight. We feel these attributes generally equal the most efficient dairy cow possible to suit a large number of New Zealand's diverse farming systems.

One of the highlights of our NZ index breeding program is the large number of young sires entering AI companies, many of these making LIC Premier Sires teams. A few of the more recent sires to make the teams are Vector, Fortune, Modor, Convict and Outlaw.

Over the last couple of years we have embraced the use of sexed semen in our flush program. This has produced some exciting results for us. Many of the animals produced in this flush program have landed in the top tier of the index lists as you will see throughout the catalogue.

Please note all NZ bred lots have LIC genomic results incorporated in their BW. All of the figures presented in the catalogue are from the March 2021 AE run.

The NZ bred animals in the sale are sold with LIC interest in the current pregnancy where stated in the catalogue. LIC contracts are also available for the following season where stated, if you wish to pursue this option, they remain unsigned for the purchaser to make their own decision on this. Many of the lots sell with LIC Generate contracts available, in which LIC pays the flush costs, this is a cost effective way to create the next generation. For more details around these contracts contact the LIC sire selection team.

The North American bred cattle are bred for high type and production breeding with no consideration given to the BW index.
Over the last several years we have invested heavily in the importation of embryos from what we consider to be North America's and the world's most elite cow families.
One of the exciting results of doing this is currently having the number 2 genomic conformation type animal in the world Busybrook SKick Bella- ET at +19 which sells as Lot 8.
We are excited to offer direct daughters from some of the biggest names from across the world Barbara, Apple, Dezi and Arangutang along with many more.

Hopefully within this catalogue you will find an animal or two that can add value to your breeding program and bring you some fun along the way.
We are more than confident the cattle will perform and produce for their new owners as they are farmed in a competitive strictly commercial environment, in a large herd and high stocking rate setting.

We extend a warm welcome to everyone and hope you will join us on the 14th of May. Anyone wishing to discuss the sale stock in more detail please don't hesitate to contact us or any of the team.

Look forward to seeing you there,
Nathan, Amanda, Brooke, Sophia & Lilly-Grace

information page

BUSYBROOK HOLSTEINS – AUCTIONEERS FORWARD 2021

Doing something successfully comes from hard work and after reading this catalogue words like dedication- attention to detail-foresight and planning must also come to mind.
After a great sale in 2018 that was attended by over 125 people where cattle were sold to purchasers throughout NZ, Busybrook have once again put together another tremendous offering that will have cattle people again eager to attend.
Whether you are in the market for top high BW contract animals or their family members or the very top genetics sourced from around the world you certainly will not be disappointed in this offering - indeed some of the overseas families feature cow dams that are currently recognised internationally as some of the top prepotent brood cows making their offspring highly sort after.
Nathan and Amanda have spared no expense over the last 18 years buying individual's or lines of cattle to enhance their already impressive herd of cows that have supplied numerous bulls to AI companies.
If you get time have a look at the Busybrook herd- rarely anywhere in NZ would you view such a large herd of cows milked on a flat/ undulating/ and steep farm that display the dairy quality, temperament and wow factor seen in our vendor's herd.
Just because BW has been important when selecting sires - getting as high as possible conformation has been non-negotiable with many contracts been offered and turned down through lack of quality TOP information.
Once again forward-thinking progressive farmers who are looking to up the ante with their genetic program should attend this sale.

Andrew Reyland
PGG Wrightson Dairy Livestock

HERD FACTS & HEALTH NOTES

The herd produces 600ms/cow average and 2350ms/ha.

- Supplements used are 900kg PK, 400kg DDG/cow/year.
- Stocking rate of just under 4 cows/ha.
- The herd was tailed with Friesian & Hereford bulls after AI finished and removed on 15/1/2021
- The heifers were tailed with Jersey and Jersey/Friesian cross bulls after AI and were removed on the 10/1/2021.
- All animals have been scanned to date but bulls were run after AI.
- Herd is EBL and BVD negative.
- Lepto vaccinated
- C10 TB Status

All in calf heifers have been teat sealed on the 31/3/21
All sale cows will be dried off before sale date and will be dry cowed with Cepravin dry cow and teat sealed.

CONDITIONS OF SALE

The following special conditions apply to this sale where applicable:

FEMALE GUARANTEES:

1. Every female shown as bred on a certain date, except any which may have been served within six weeks of sale, is guaranteed in-calf. This guarantee expires 28 days from the sale date.
2. Where a sale catalogue specifies a calving date and the resultant calf is not acceptable for registration by the MINDA service of the Livestock Improvement Corporation (LIC) or by the relevant Breed Society because the calf is born eleven days or more either side of the specified calving date and the paternity is not able to be verified the seller shall refund 25% of the purchase price plus GST direct to the buyer.
3. This clause 2 does not apply if the sale catalogue states that a bull was pastured after AB ceased.
4. Where a veterinary certificate is supplied at the date of sale certifying the female as being in-calf, no further liability will fall on the seller subject to liability under the other clauses contained in the Conditions of Sale. The buyer has the right to retest at their own expense before delivery is made from the place of sale. Where a female is offered for sale as being in-calf, without a supporting veterinary certificate and the female is subsequently proved to be empty, the buyer has the right to return the female or carry out such disposal as the seller may instruct and the seller will refund direct to the buyer the purchase price plus the return transport costs.
5. Cows sold as not in-calf at the time of sale, shall be sold with a guarantee to breed. The term breed shall constitute producing a calf, dead or alive. Should the cow fail to produce a calf by the 31 December 2022, the seller shall refund in full the purchase price direct to the buyer.
6. Yearling heifers sold as unmated are sold with the guarantee to breed. The term breed shall constitute producing a calf, dead or alive. Should the heifer fail to produce a calf by the 31 December 2022, the seller shall refund in full the purchase price direct to the buyer.
7. Where females are sold as not in calf, (including yearlings and calves), are flushed for embryo transfer, either with or without success, all guarantees to breed become null and void.
8. Where any female sold as being in-calf proves to be carrying a mummified calf, no liability will fall on the seller.
9. Any animal which is sold as in-calf but subsequently aborts the foetus after delivery is the responsibility of the buyer and no liability will fall on the seller.
10. Any claim to the auctioneers must be accompanied by a veterinary certificate

GENERAL CONDITIONS:

DELIVERY: Each lot shall, immediately on the fall of the hammer, be at the risk of the buyer.
INSURANCE: If transit or annual insurance is required, such cover can be arranged through the auctioneers.
INSTRUCTIONS: Buyers must sign dockets before leaving the sale and leave full delivery instructions.
TRANSFERS: Sellers are responsible for the completion of transfers. No buyers shall be entitled to withhold payments for stock pending delivery by the seller of the relevant breed society
transfer certificate or LIC Animal Location Transfer Certificate.
CATTLE FOR EXPORT: All stock sold for export are to be inspected by Official Inspectors of the Breed Society concerned prior to Export Certificates being granted for such stock. The seller is
responsible for the 15% commission payable on all cattle sold for export.
PAYMENT TERMS: Payment 14 days after date of sale.

PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW.

B 19 BUSYBROOK DARK LI-ET S1F

First JIVET produced calf to ever sell in NZ and she is sired by the very rare outcross sire Darkstar. She is the number 2 BW HF Darkstar in NZ. She sells with LIC interest in the current pregnancy, with a potential LIC Generate flush contract available for next season (depending on how she calves in.)

Dam had an LDA shortly after calving as a 2yr old which knocked her around but is looking great and will calve again this spring. The Grandam was sold at our last sale and hasn't been herd tested or classified since, but has calved again twice.
