The herd was sold last season to the Poole family who farm at Pirongia milking 720 cows.

The Poole family comprising of John & Anne, their son Chris and his wife Emma who is also a local vet and knew the Dickson family and herd quite well.

Chris says that they were STOKED when the opportunity came to purchase the herd as the Dickson's genetics had already proven themselves within their herd.

Chris also confirmed that the herd is performing very well this season.

- Herd production was consistently 1400kgMS/ha
- 500kgMS/cow
- Numerous bulls have been selected by AI Companies from this herd.
- Surplus heifers sold in the past have excelled in a large herd environment.

### In-calf heifer & cow details:

The line of in-calf heifers that were sold last year on bidr® went far and wide with reports back being very good.

This year's line looks even better both on paper and in the paddock.

## Auctioneer Foreword

As previously stated Murray & Julie sold their herd last year to a local farming enterprise where they are performing very well within a large herd. The in-calf heifers sold on bidr® last year have also performed on the comments I have received above expectations, some have been in the top production in the two-year-old heifers.

The Dickson Family had owned this herd for over 60 years focusing on breeding medium framed; big capacity cows with good temperament and dairy conformation.

The enjoyment that Murray and Julie got from having well fed, contented cows was very evident as many come up for a scratch when walking through them.

There are many strong maternal families within the herd that tick the boxes for indexes and production, resulting in a good number of females having been contract mated, and young sires selected for AI Companies

This is a great opportunity to really enhance your breeding program and profile by buying top indexing and performance proven genetics from genuine farmers.

Come to the open day or give me a call to discuss.
