# CONDITIONS OF SALE

The following special conditions apply to this sale where applicable:

### **MALE GUARANTEES:**

Guaranteed to be 'fit for purpose' this guarantee applies to fertility of bull, if the bull proves to be infertile the vendor will refund the purchase price plus GST. Any claim needs to be made by 20th November 2023.

### **GENERAL CONDITIONS:**

**DELIVERY:** By the 26th April 2023, each lot at the fall of the hammer, will be at the risk of the buyer. Buyers to complete Purchaser's Instruction Slip (no delivery instructions will be accepted verbally) at the conclusion of the sale.

**INSURANCE:** If transit or annual insurance is required, such cover can be arranged through the auctioneers.

**INSTRUCTIONS:** Buyers must sign dockets before leaving the sale and leave full delivery instructions.

**TRANSFERS:** Purchasers are to supply their Herd Code, Participant Code & NAIT number as transfers will be done electronically. Sellers are responsible for the completion of transfers. No buyers shall be entitled to withhold payments for stock pending delivery by the seller of the relevant breed society transfer certificate or LIC Animal Location Certificate.

**PAYMENT TERMS:** Payment 14 days from Auction date.

**PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW.**

# VENDOR'S FOREWORD

Welcome to the first Java South Devon Bull Auction. We chose to auction our bulls this year in conjunction with our full dispersal sale of our Holstein herd. We invite you to join us in person at our property in Balfour or online with bidr®.

We are taking a step back and exiting dairying after for Stewart over 35 years in the industry full time.

For the first time we are offering offspring directly from the embryos we imported in 2014 (born 2015) from the Torr Down stud in Australia.

This family (the N family) has had a significant impact on our breeding. They offer all the attributes of the South Devon we are wanting to breed. They are easy doing, well fleshed and muscled. They have good fats and are not extreme size.

The Australian genetics have had a very positive impacts on where we as beef farmers get paid, in the EMA and the fats. Maintaining the true South Devon temperament is a must along with "easy doing" cows. Our cows are assigned "clean up duty" after the dairy cows to maintain pasture quality and they must achieve rearing a calf, getting back in calf and maintaining their own body weight while doing so.

This balance has worked well in our system running along side the dairy cows where we need the beef animals away at 15-18 months of age. They are consistently achieving this goal.

In conjunction with stud animals we run a commercial beef herd. The cows in this herd are predominantly South Devon crosses, offering the amazing maternal attribute this breed offers along with the growth of the Hybrid Vigour.

This year was our first year achieving the allusive local butcher trade with these animals obtaining the 15-month-old heifer carcass of 245kg.

We have used any bulls that have not previously been privately sold over the dairy cows, with the calves being well sort after at four days old. We have grown a number of these animals out ourselves and it is not uncommon to achieve a 320kg carcass at 15 months old.

All the bulls in this catalogue are heterozygous polled. They have been fertility and BVD tested and vaccinated by NSVets at Riversdale.

For us it is not all about the "show animal" while it is a great hobby and family time it does not pay the bills. Achieving the weights in the shortest time is what makes the "cash flow!"

Because of different base settings you are UNABLE to compare EBV'S across breeds. EBV'S can ONLY be compared WITHIN breeds.

**This catalogue was designed by  
Holstein Friesian New Zealand.**

Tonka has continuously and consistently proven himself throughout the years. Originally used as a heifer bull with great success, he was then used over the South Devon herd as sire bull. For the last four plus years he has been the main stay dairy herd sire, and back when we were winter milking would cover the Autumn Calving herd, then would have a few weeks break before heading out with the Spring Calving herd. He is in the top 10% for Birth Weight. His Holstein cross progeny have consistently grown out well and fast. Killing at 15 months around the 320Kg on the hooks. I cannot say enough about this bull and the positive impact he has had on our herd. He is the sire of the 2019 Junior Champion at

NZAG show, and his progeny have numerous wins in the show ring behind them. He has a great temperament and is set up right to walk the distance we asked him to walk every day.

BURTERGILL JACK SUSIE 11

This bull sired the 2022 NZAG Junior Champion. He has good calving ease data and his daughters are lining up to prove that his daughter calving ease is going to be accurate as they have wide rumps and are good hip to pin. With his very positive milk these heifers are shaping up to good future matrons of the herd. He has continued to add good fats and IMF to his progeny. If I was able I would be keeping one of his sons to continue breeding.

Niko is a proven heifer bull. He has proven heifer progeny on the ground. In the top 15% Birth Weight and Rib and Rump fats. He is a heterozygous polled. Used as a yearling bull and again this year not only as a heifer bull but also in the Dairy herd. His progeny have so far shown all the attributes that we breed for in our South Devons.
