# Introduction

**Welcome to Woodcote Sale** | On account of Andrew Fullerton, Gordon Fullerton and Pete Smit

---

Tuesday, 23 April 2026 at 11:30am

*On farm at 516 Otorohanga Road, Te Awamutu and on bidr\**

**Contacts:**

**Andrew Fullerton:** 027 555 0871

**Gordon Fullerton:** 027 581 7751

**Pete Smit:** 027 815 4651

**Andrew Reyland (PGG Wrightson):** 027 223 7092

**Bill Moore (PGG Wrightson):** 027 825 7505

**Comprising of.**

40 In-milk Holstein Friesian spring calving cows

21 In-calf Holstein Friesian spring calving heifers

*Woodcote are going to all autumn calving, hence the complete line of spring cows on offer. A great opportunity to get into some top families.*

*Full-On Farming dairy operation is shifting to the South Island to a going concern dairy farm. These animals would not have been offered for sale otherwise.*

---

# Conditions of Sale

The following special conditions apply to this sale where applicable:

**FEMALE GUARANTEES:**

1. Every female shown as bred on a certain date, except any which may have been served within six weeks of sale, is guaranteed in-calf. This guarantee expires 28 days from the sale date.
2. We believe the information provided around pregnancy testing to be accurate to the best of the vendor's knowledge. All efforts to record these dates accurately have been taken with great care and attention to detail. No liability is taken for inaccuracies that may result in a misdated pregnancy. All animals have been dated by a veterinarian, and these dates were recorded in MINDA by the veterinarian present on the day.
3. This clause 2 does not apply if the sale catalogue states that a bull was pastured after AB ceased.
4. Where a veterinary certificate is supplied at the date of sale certifying the female as being in-calf, no further liability will fall on the seller subject to liability under the other clauses contained in the Conditions of Sale. The buyer has the right to retest at their own expense before delivery is made from the place of sale. Where a female is offered for sale as being in-calf, without a supporting veterinary certificate and the female is subsequently proved to be empty, the buyer has the right to return the female or carry out such disposal as the seller may instruct and the seller will refund direct to the buyer the purchase price plus the return transport costs.
5. Cows sold as not in-calf at the time of sale, shall be sold with a guarantee to breed. The term breed shall constitute producing a calf, dead or alive. Should the cow fail to produce a calf by the 31 December 2027, the seller shall refund in full the purchase price direct to the buyer.

6. Yearling heifers sold as unmated are sold with the guarantee to breed. The term breed shall constitute producing a calf, dead or alive. Should the heifer fail to produce a calf by the 31 December 2027, the seller shall refund in full the purchase price direct to the buyer.
7. Where females are sold as not in calf, (including yearlings and calves), are flushed for embryo transfer, either with or without success, all guarantees to breed become null and void.
8. Where any female sold as being in-calf proves to be carrying a mummified calf, no liability will fall on the seller.
9. Any animal which is sold as in-calf but subsequently aborts the foetus after delivery is the responsibility of the buyer and no liability will fall on the seller.
10. Any claim to the auctioneers must be accompanied by a veterinary certificate.

**GENERAL CONDITIONS:**

**DELIVERY:** Each lot shall, immediately on the fall of the hammer, be at the risk of the buyer.

**INSURANCE:** If transit or annual insurance is required, such cover can be arranged through the auctioneers.

**INSTRUCTIONS:** Buyers must sign dockets before leaving the sale and leave full delivery instructions.

**TRANSFERS:** Sellers are responsible for the completion of transfers. No buyers shall be entitled to withhold payments for stock pending delivery by the seller of the relevant breed society transfer certificate or LIC Animal Location Transfer Certificate.

**PAYMENT TERMS:** Payment 14 days after date of sale.

**PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW.**

# Vendor's Foreword

## **The History and Development of Woodcote Stud**

Woodcote Stud was established in 1993 on Peter Fullerton's first farm, where he milked 165 cows. In 1999, Peter and his wife, Angela, sold half of their herd to help purchase the current farm. The farm was acquired late in the season as a going concern and included a high-quality, well-documented Friesian herd. This Friesian herd, combined with the 80 cows they retained from their original farm, became the foundation of the Woodcote herd that exists today.

Sadly, Peter passed away in 2000. However, the farm, family, and Woodcote herd have continued to thrive and improve. The next generation of the family is now actively involved in dairy farming, and this sale is intended to support them in their next steps. Andrew (Woodcote) is selling some of his best cows to help fund the purchase of the family farm, while Gordon (Full-On) is selling some of his better cows to facilitate a larger sharemilking opportunity in Canterbury.

## **Focus on Breeding Quality**

From the beginning, Woodcote has always placed a strong emphasis on breeding high-quality cows. One of the family's original favorites, cow 200 Skelton Samie—a Skelton from the original farm—had her last calf at 17 years old. Remarkably, some of her progeny are still part of the herd today, and some are being sold in the sale, such as Lot 4.

From 2004, the breeding program included doing our own artificial breeding (AB), a skill that Glenn Clarke learned when he and Angela joined forces. Our focus was to breed good, capacious cows with high milk production and longevity in their

udders to meet production demands. We aimed to have cows that milked well, maintained body condition to conceive again, and milked for multiple lactations; many cows in the pedigrees have over 10 lactations. Over the last 15 years, the herd has averaged 600kgMS per cow, which is evident when reviewing the pedigrees.

We have invested significant resources into embryo transfer (ET) work on our best cow families, which now make up a large part of the milking herd:

- Mel Family
- Lara Family
- Gorji Family
- Cherry Family

Our first bull was sold to LIC in 2002, and over 60 bulls have since been selected by NZ breeding companies. Although we have chosen to no longer work with LIC, many of the bulls continue to outperform their genomic predictions. Currently, the Lara family has more bulls in the Top 30 Holstein bulls than any other family, with four bulls in the top 30.

Progeny from these cow families is available in this sale. Along with daughters from 1,000kgMS cows and descendants of lifetime 100,000-litre cows. Buyers of our animals may likely have opportunity to work with breeding companies in the future. Some individual animals have already been offered contracts. We have put up some of best genetics in this sale.

Happy bidding!

---

# Auctioneer's Foreword

It is a pleasure to present this catalogue, featuring a select offering from three progressive young breeders who are making significant strides within the industry.

Brothers Andrew and Gordon Fullerton, together with their good friend Pete Smit, have combined to assemble a quality line-up of high-type, productive cows and in-calf heifers, many carrying highly valuable pregnancies.

This offering represents a carefully selected blend of New Zealand and international genetics, providing genuine opportunities for herd improvement and long-term breeding advancement. A great deal of investment has

gone into sourcing elite embryos and semen from leading programs around the world, giving purchasers access to sought-after cow families that are typically difficult to secure.

For buyers focused on phenotypes, production, and proven maternal strength, this sale presents an opportunity to invest in genetics that have already demonstrated their worth in large, demanding production environments.
